INTRODUCTION

Cammack Retirement Group is committed to delivering the highest quality service to its clients no matter what the circumstances. The current environment created by the COVID-19 pandemic has presented challenges for all organizations to maintain their operational practices at a level consistent with their usual standards. For us, the primary obstacle has been the elimination of our ability to hold in-person meetings with our clients' retirement committees, as well as their participants. This direct onsite interaction has always been a hallmark of our service model and our philosophical approach.

While the present conditions are unprecedented in our lifetimes, Cammack Retirement has experienced disruptions to its standard business model from other external occurrences. Events, such as the September 11th attacks in 2001, the Northeast blackout in 2003 and Hurricane Sandy in 2012, forced us to consider our approach and how we interact with our clients. We developed the tools and connectivity to enable all staff to work remotely and have secure access to all client data and files to be able to produce our due diligence reports. We have further enhanced our capabilities so we can continue to communicate with our clients in the manner most preferable to them.

The recent market volatility and declining retirement account balances have undoubtedly created angst for plan sponsors and their participants. We believe it is critical that we connect with the retirement plan committees of our clients to discuss the impact of the market environment and changing regulations. We are doing this through virtual meetings, video conferencing and regular phone calls for direct interaction, along with our newsletters, alerts, email, and social media postings, as we all operate in our remote working atmosphere.

EXECUTIVE SUMMARY

Plan Review

- As of June 30, 2020, the State of Delaware Deferred Compensation Plans held approximately \$905.5 million¹ in total active plan assets, representing an increase of approximately \$114.2 million (14.4% change) over total assets as of March 31, 2020. Contributions to the Plans during the quarter totaled approximately \$14.4 million (Q2 2019 contributions totaled approximately \$15.4 million).
 - \$727.2 million was invested in the State of Delaware 457(b) Deferred Compensation Plan
 - \$156.2 million was invested in the State of Delaware 403(b) Plan
 - \$22.2 million was invested in the State of Delaware 401(a) Match Plan
- The weighted average expense ratio of the funds (excluding the Voya Fixed Plus Account) is 0.32%, as compared to the most commonly reported average asset-weighted expense the 2020 PLANSPONSOR Defined Contribution Survey of Governmental (County/State/Federal) Plans of 0.25%-0.50% expense ratio range (for plans between \$200M and \$1B). The 2019 NAGDCA Perspectives in Practice Survey reported a median expense ratio of 0.36% for all plans surveyed (median assets of \$645 million).
- There is an asset-based fee of 0.08% charged to each participant; this fee pays for Voya recordkeeping and administrative services. There is an asset-based fee of five basis points 0.05% (not to exceed \$200 annually) charged to each participant; this fee pays the State of Delaware's administrative fee.

Plan Expense	Plan	Benchmark ²
Plan Average Expense	0.13%	0.13%
Recordkeeping Expense	0.08%	0.09%
Plan Administration Expense	0.05%	0.04%

¹Does not include assets held in individual accounts at previous/legacy providers/contracts. 403(b) legacy vendor assets are valued at approximately \$263.6 million as of 06.30.2020.

²2019 NAGDCA Perspectives in Practice Survey Report, plans with assets between \$700M and \$2.25B.

EXECUTIVE SUMMARY (CONTINUED)

Investment Highlights

- The Plan Expense Reimbursement Account balances as June 30, 2020 were as follows:
 - \$194,740 in the State of Delaware 457(b) Deferred Compensation Plan
 - \$48,542 in the State of Delaware 403(b) Plan
 - \$1,828 in the State of Delaware 401(a) Match Plan
- Based on the analysis of funds under the Plans, using the criteria outlined in the Investment Policy Statement, the following fund recommendations are being made for consideration by the Committee:
 - Templeton Global Bond R6 – Replace (Placed on Watch Q4 2019)
This benchmark agnostic-strategy prefers to invest in high real yielding sovereign markets and currencies and traditionally has limited exposure to the low-and-negative yielding developed market countries (i.e., Europe and Japan). The sharp decline in interest rates in 2019 was a key source of underperformance relative to its prospectus benchmark and peers. The fund's low duration positioning for rising rates was hurt by rates falling dramatically amid the coronavirus outbreak in Q1. The sharp decline in interest rates, a sizable out-of-benchmark position in Argentina and the fund's currency positioning have detracted from returns in recent quarters. These missteps have opened up a sizeable performance deficit versus the fund's benchmark and peers. The global bond asset class has many headwinds that have eroded its diversification benefits with traditional bond and equity investments.
 - JPMorgan US Small Company R6 – Remove from Watch (Placed on Watch Q1 2019)
The fund's investment process blends quantitative and fundamental analysis to construct a portfolio of attractively valued companies with conservative management teams and high-quality earnings. The fund's recent tilts to more value factors has been a major detractor from relative performance in markets where growth oriented stocks outperformed value stocks over the last three years (specifically in 2017). The change-up in management has thus far been beneficial for the fund, as it performed in the top third of its peer group YTD 2020. Management attributes this to strong stock selection (which is following a portfolio restructuring at the beginning of 2019).

EXECUTIVE SUMMARY (CONTINUED)

Investment Highlights (continued)

- The recommendation for the remaining investments is: Not for Watch.
- There are no funds with a recommendation Not for Watch performing in the bottom quartile for the 3-, 5-, or 10-year period.
- American Funds Target Date Retirement Fund series has added the 2065 vintage (RFVTX). This fund will be added to the Tier One investment options, per Plans Management Board decision, and be available to plan participants on August 10, 2020.

Tier One Highlights (Target Date Suite)

- Approximately \$667.5 million was invested in the American Funds Target Date Retirement Fund series (represents 74% of assets). The target date series is designated as the Plans' default investment, which is to be used in the event a participant does not make an investment election.
 - 89% of unique Plan participants (across all plans) were invested in the target date series (21,921 unique participants).
 - The target date series received approximately 73% (\$10.6 million) of new contributions in the second quarter of 2020.
 - Across the target date series, the average annualized returns rank in the top quartile for the 3-year, 5-year, and 10-year performance periods for most vintages.³
 - The exceptions were the 3-year average annualized returns for the 2010 and 2015 vintages, which ranked between the 46th-50th percentile.³
 - Across the target date series, the average Sharpe Ratio ranks in the top quartile for most vintages.³
 - The exceptions were the 3-year Sharpe Ratio for the 2010 and 2015 vintage, which ranked in the 32nd-59th percentile.

³The 2060 vintage is excluded from 10-year rankings (introduced 3/27/2015).

EXECUTIVE SUMMARY (CONTINUED)

Investment Highlights (continued)

Tier Two Highlights (Core Fund Array)

- \$213.9 million was invested in Tier Two (represents 24% of assets).
 - Tier Two received approximately 27% (\$3.9 million) of new contributions in the second quarter of 2020.
- Approximately \$22.2 million was invested in the Voya Fixed Plus Account III (across all Plans)
 - Across all Plans, the crediting rate for the Voya Fixed Plus Account is 1.35%. The minimum guaranteed crediting rate is 1.00%.
- Approximately \$191.6 million was invested in the Tier Two mutual fund options:
 - For the 3-year period, 77% of the funds (10 of 13 funds) rank above the median; 38% (5 of 13 funds) rank in the top-quartile; 8% of the funds (1 of 13 funds) rank in the bottom quartile.
 - For the 5-year period, 77% of the funds (10 of 13 funds) rank above the median; 54% (7 of 13 funds) rank in the top-quartile; 8% of the funds (1 of 13 funds) rank in the bottom quartile.
 - For the 10-year period, 92% of the funds (12 of 13 funds) rank above the median; 62% (8 of 13 funds) rank in the top-quartile; no funds rank in the bottom quartile.
- As of June 30, 2020, there were approximately \$13.2 million (1% of total Plan assets) invested in the Managed Account service, representing 359 unique users across plans (compared to 362 unique users across plans as of 03.31.2020).

Tier Three Highlights (Self Directed Brokerage Account)

- The TD Ameritrade Self Directed Brokerage Account held approximately \$24.1 million (represents 3% of assets), across 532 participant accounts compared to 506 participant accounts as of 03.31.2020.

Other Items

- Communications with participants regarding assets at legacy providers
- Discuss future recordkeeper RFP

**Proposed dates; pending Committee approval*

IRS Expands CARES Act Loan/Distribution Relief

On June 19, 2020, the IRS released [Notice 2020-50](#), providing guidance on CARES Act distributions. There are some noteworthy new provisions, including the following:

- Guidance significantly increases the number of the individuals eligible for COVID-19 distributions (and loans, since same eligibility criteria).
- Safe harbor that plan sponsors can now follow for the administration of the delay in loan repayments due through the end of 2020.
- Model self-certification language for COVID-19 distributions.
- Amounts that are not eligible rollover distributions cannot be treated as COVID-19 distributions.
- COVID-19 distribution repayments will not count toward the one IRA rollover per year limit.
- 409A non-qualified deferred compensation plans (including 457(f) plans) can cancel deferral elections for those who receive a COVID-19 distribution.

IRS Issues Additional Guidance on 2020 Required Minimum Distribution Waiver

On June 23, 2020, the IRS Issued [Notice 2020-51](#), which provides long anticipated guidance on the application of the CARES Act Required Minimum Distribution (RMD) Waiver for 2020. Key provisions are:

- Those who took an RMD in error in 2020 will have until August 31, 2020 to correct the error.
- Those who turned age 70 ½ in 2019, but retired in 2020, will have their first RMD due by December 31, 2021.
- The 2020 RMD waiver does NOT impact a participant's required beginning date.
- Sample amendments are provided for plan sponsors to use in connection with the waiver of RMDs for 2020.

ECONOMIC REVIEW:

KEY MARKET OBSERVATIONS

Equity Markets

- The S&P 500 index surged 20.5% in the 2nd quarter, the best quarterly result since the 4th quarter of 1998. The index's impressive recovery produced a near-complete turnaround from the 1st quarter.
- U.S. Large Growth stocks outperformed U.S. Large Value stocks by more than 26.1% in the 1st half of the year, the largest differential since 1999.
- All sectors of the S&P 500 index posted positive returns for the quarter, led by consumer discretionary, info technology and energy. Consumer staples and utilities lagged considerably.
- Stocks with higher volatility, valuation and growth factors and lower dividend yields continued to lead the market higher. According to Merrill Lynch, a record 77% of S&P 500 stocks are now paying higher dividends than Treasuries.
- International Developed and Emerging markets delivered their best quarterly performance in a decade, with the MSCI EAFE index up 14.9% and the MSCI Emerging Markets index gaining 18.1%. While their results were strong, the foreign markets have not been able to keep pace with U.S. equities.

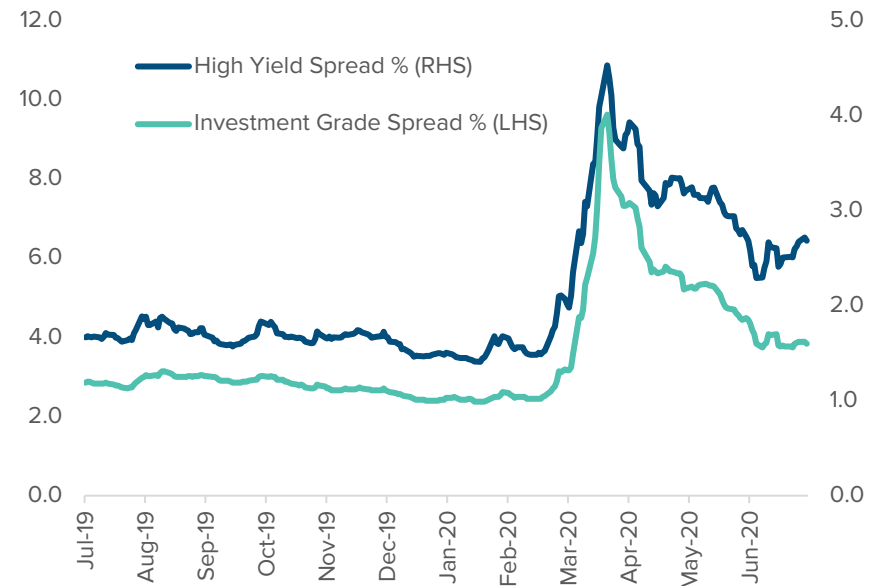

Bond Markets

- The Federal Reserve began buying individual corporate bonds, high yield exchange traded funds (ETFs) and fallen angels, which has been supportive for the credit related sectors of the bond market.
- Corporate bonds saw a sharp reversal this quarter as the Fed's unprecedented steps to stabilize the markets started working. In the investment grade sector, BBB-rated bonds outperformed the AAA-rated bonds by nearly 700 basis points.
- The Fed's liquidity programs have been so effective that there has been a record amount of investment grade and high-yield issuance in recent months.
- The 10-year Treasury yield stayed within a tight range, finishing the quarter 4 basis points lower at 0.66%. Break-even inflation rates, the difference between nominal and real rates, continued to recover from the March lows.
- The amount of assets in money market mutual funds is the highest in history at \$4.8 trillion, far exceeding the previous two records which took place during the Tech Bubble and Great Financial Crisis.

The S&P 500 Index Staged a Sharp Rebound

Corporate Bond Spreads Partially Reverse Last Quarter's Losses

ECONOMIC REVIEW:

CONCENTRATION RISK IN THE LARGEST STOCKS HAS SOARED IN RECENT YEARS

Market cap of the 10 largest companies as a share of the S&P 500 Index

Market Observations

- The current concentration of market leadership in the Top 5 companies in the S&P 500 Index has surpassed any historic precedent, even the tech-inspired bubble top of 2000. The concentration risk is even greater for the tech-heavy weighted Russell 1000 Growth Index, where the Top 5 companies represent nearly 37% of the Index.
- High concentration poses a risk for investors, particularly if the market begins to shift away from the current high growth companies that have dominated performance in recent years. Historically, changes in leadership tend to occur during recessions when defensive-oriented sectors, such as telecommunication services, healthcare and consumer staples, give way to early-cycle leaders, such as consumer discretionary, financials and industrial sectors.
- With such high concentration in a small sub-set of companies in the S&P 500 Index and Russell 1000 Growth Index, it may be worthwhile to consider diversifying equity exposure across other sectors, regions or styles of management to help navigate any future volatility. History suggests caution is warranted when concentration levels reach extremes as complacent investors can be vulnerable to changes in market leaders.

Investment Analysis

INVESTMENT ANALYSIS: VOYA FIXED PLUS ACCOUNT III - ALL PLANS

RECOMMENDATION:

Not on Watch

OBJECTIVE

- Stability of principal is the primary objective of this investment option

LIQUIDITY

- Employer: If a full withdrawal is requested, the Voya Fixed Plus Account III will pay amounts with interest, in five annual payments
- Employee: No charges or restrictions for benefit sensitive withdrawals

RESTRICTIONS

- Equity wash rules may apply if plan offers competing funds (money market, short-term high quality bond or brokerage window)
- Liquidity - restricts transfer of assets to outside providers

Strategy
 The fund invests in short-term obligations issued or guaranteed by the US government, its agencies or instrumentalities while maintaining an average weighted maturity of 60 days or less and an average weighted life of 120 days or less.

Liquidity
 As a money market fund, the Portfolio must meet the requirements of Securities and Exchange Commission (“Commission”) Rule 2a-7. The Rule imposes strict conditions on the investment quality, maturity, diversification, and liquidity of the Portfolio’s investments. Among other things, Rule 2a-7 requires that the Portfolio’s investments have (i) a remaining maturity of no more than 397 days unless otherwise permitted by Rule 2a-7, (ii) a dollar-weighted average maturity of no more than 60 days, and (iii) a dollar-weighted average life to maturity of no more than 120 days. Rule 2a-7 imposes liquidity standards that require the Portfolio to hold at least 10% and 30% of its total assets in daily liquid assets and weekly liquid assets, respectively, as defined in Rule 2a-7. Rule 2a-7 also limits the Portfolio’s investments in illiquid securities to 5% of its total assets.

Restrictions
 If there is a fixed account also in the array, transfers between the fixed and money market accounts may be subject to an “equity wash” provision. Monies may not be able to move directly between the fixed and money market funds but must pass through an equity fund. Money market funds may also be the medium by which transfers to a brokerage account may be made.

Q2 2020 Recommendation

During the February 2020 meeting, Cammack Retirement discussed potentially placing this fund on watch due to a recent manager change. The committee members discussed their opinions concluding not to place the fund on watch at that time. One of the fund's three co-portfolio managers, Mihir Worah, retired in March 2020. Mohit Mattal joined the existing team in December 2019 in anticipation of Worah's retirement. While Mittal's expertise in managing multi-sector bond, credit, and long-duration portfolios differs slightly from Worah's real return experience, the fund remains in good hands and has access to a deep bench of experts across the firm.

Sector review, securities selection, and risk management

This core-plus bond strategy uses diversified sources of alpha to add value relative to the fund's benchmark, the Bloomberg Barclays U.S. Aggregate Index. The manager has considerable flexibility to invest across a global opportunity set and actively allocate to out-of-benchmark sectors, such as non-U.S. developed and emerging markets, high-yield debt, and currencies. The fund entered the year conservatively positioned, with a slightly longer duration stance than its benchmark and significantly less exposure to investment grade corporates, securitized debt, and emerging markets than its peers. Although the fund underperformed its benchmark during the 1st quarter, these tactical shifts served the fund well relative to its peers. Performance was strong relative to the benchmark in the 2nd quarter, with positions in non-agency MBS, TIPs and select credits adding value.

Management and additional details

This fund is team-managed by Scott Mather, Mark Kiesel, and Mohit Mittal. The team is supported by the massive investment staff across the firm and benefits from the leadership of Chief Investment Officer Dan Ivascyn.

Q2 2020 Recommendation

We recommend replacing this fund due to performance issues. The manager has struggled to add value during the challenging market environment over the last few years. The manager's short duration posture, out-of-benchmark position in Argentina and currency positioning have detracted from performance in recent years. While we recognize the manager's contrarian style can sometimes cause the fund to look out of step with its peers, we are concerned the recent deterioration in performance.

Sector review, securities selection, and risk management

This fund now sits in the Nontraditional Bond category in 2019 due to the manager's significant flexibility to adjust duration relative to its benchmark, the FTSE World Government Bond Index. This fund differs considerably from its newly assigned peer group, which is dominated by U.S.-centric, low-volatility strategies that invest primarily in corporate credit. This strategy continues to follow an opportunistic approach to investing in global government bonds and currencies. The fund's more distinctive style has stood out from its World Bond peers, where the manager has traditionally avoided investing in the low- and negative-yielding developed markets in favor of emerging markets countries with better fiscal prospects. The sharp decline in interest rates, a sizable out-of-benchmark position in Argentina and the fund's currency positioning have detracted from returns in recent quarters. These missteps have opened up a sizeable performance deficit versus the fund's benchmark and peers. While the fund outperformed its peers during the volatile 1st quarter, the manager's defensive positioning restrained performance during the Q2 rebound.

Management and additional details

Michael Hasenstab is the lead manager and Calvin Ho was elevated to co-manager following Sonal Desai's promotion in 2018.

Q2 2020 Recommendation

We recommend taking this fund off of watch due to the fund's increased relative performance and successful manager departure of Dennis Ruhl from the firm's behavioral finance department. The fund employs a quantitative and fundamental process to construct a portfolio of attractively valued companies with conservative management teams and high-quality earnings. The fund's longer-term performance is impacted negatively by the fund's bottom quartile performance in 2017, due primarily to the strong growth bias in the market. Moving into 2020, as the 2017 data begins to roll off the 3-year metrics, the fund has substantially increased in relative performance standings. The fund's value tilt has proven successful, especially in down market quarters, where the fund has outperformed peers over the last three years.

Sector review, securities selection, and risk management

The fund strategy is underpinned by the belief that investors are prone to behavioral biases that cause them to overreact to negative news and underreact to positive news. When analyzing risk, various indicators show that the fund has had above-average risk and below-average return for the past 3 years. The change-up in management has thus far been beneficial for the fund, as it performed in the top third of its peer group YTD 2020. Management attributes this to strong stock selection (which is following a portfolio restructuring at the beginning of 2019). The team's emphasis has been on identifying undervalued stocks that should perform well in the "new normal" economic environment. As 2020 looks to be increasingly volatile, management says it is focusing on its high quality holdings, and to remain disciplined (in both stock selection and its behavioral models) moving into the rest of the year.

Management and additional details

Dennis Ruhl departed from JP Morgan as of December 2019. Nick Horne took over lead on the new global behavioral finance team but is not a co-manager on this strategy. Multiple analysts (Wonseok Choi, Akash Gupta, Lindsey Houghton, and Jonathan Tse) have now been promoted to help manage the fund.

INVESTMENT ANALYSIS:

TARGET DATE SUMMARY: AMERICAN FUNDS TARGET DATE RETIREMENT

RECOMMENDATION - Not on Watch

CAMMACK RETIREMENT CLASSIFICATION

PRESERVATION OF CAPITAL			EXTENSION OF CAPITAL		
Target date series are managed more conservatively to provide downside protection			Target date series are managed more aggressively to address longevity risk		
Most Conservative	Conservative	Moderately Conservative	Moderately Aggressive	Aggressive	Most Aggressive

EQUITY GLIDEPATH

GLIDEPATH NOTES

- Equity at retirement (age 65) is 45% and Equity at landing point (age 95) is 30%
- Glidepath-within-a-Glidepath: glidepath distinguishes between the types of equity or fixed income investments in terms of the role they can play in a portfolio
- Diversifies the type of equity throughout the glide-path by shifting over time from growth-oriented to dividend-focused funds. Equity gradually shifts to higher yielding funds with a history of lower volatility
- Deploys different types of bonds at various stages in the glide-path to mitigate risk but provide meaningful equity exposure approaching and throughout retirement without increasing volatility

Due Diligence Methodology and Process

INVESTMENT ANALYSIS: MONITORING CRITERIA

In evaluating investments, the process is driven by your Investment Policy Statement. We review:

- Performance vs. Peers (Category)
- Performance vs. Indexes
- Risk Characteristics
- Expenses vs. Peers
- Style Purity
- Investment Objectives
- Manager Tenure
- Management Team

INVESTMENT ANALYSIS: SCORECARD METHODOLOGY

SCORECARD

Tests	Requirement to Pass Screen
Manager Tenure	Lead Manager with greater than two years of experience with fund or similar asset class.
Performance vs.Benchmark Index:3-,5- and 10-Year	Returns no worse than 100 bps below the respective index over 3-,5- and 10- year periods
Category Ranking:3-,5- and 10-Year	Ranking of less than or equal to 60th percentile over 3-,5- and 10- year periods(the lower the category rank percentile, the better)
Risk(3-Year Standard Deviation)	Standard Deviation less than or equal to 1.1x the respective benchmark
Risk-Adjusted Return(3-Year Sharpe)	Returns greater than or equal to 0.9x the respective benchmark
R-Squared	Greater than or equal to R-Squared value of 70 when compared to respective index
Expense Ratio(Prospectus Net)	Expense ratio below the Morningstar peer group average
Morningstar Rating(Overall)	Rating greater than or equal to 3 Stars.

Glossary and Standard Disclosures

GLOSSARY AND STANDARD DISCLOSURES

CREATING CAMMACK LARHETTE ADVISORS' PROPRIETARY TARGET DATE ANALYSIS

STEP 1:	Break down each TDF suite using Morningstar asset classes, based on equity exposure.
STEP 2:	Take the average equity exposure for each Morningstar category & calculate the deviation from that average for each fund.
STEP 3:	Weight the deviations based on the position within the glide path (e.g., weighting the age 45–65 age period more heavily than deviations at younger ages).
STEP 4:	Calculate a score for each target date series based on the individual asset weighting scores (standard deviation x weighting) for each fund within the target date series. The Cammack Target Date Universe is the average of 47 Target Date fund families. Assign each TDF to one of the six categories, based on their relative scores. <u>Preservation – Most Conservative:</u> Invesco Balanced Risk Retirement, Great-West Lifetime Conservative, JHancock Multi-Index Preservation, Harbor Target Retirement, Manning & Napier Target, <u>Preservation – Conservative:</u> T. Rowe Price Target, American Century One Choice, JP Morgan SmartRetirement® Blend, JPMorgan Smart Retirement®, MassMutual RetireSMART, PIMCO RealPath Blend, Putnam RetirementReady, USAA Target Retirement, Dimensional Target Date Retirement <u>Preservation – Moderately Conservative:</u> Voya Target Retirement Funds, AllianzGI Retirement, American Funds Target Date Retirement, Wells Fargo Target Date, Goldman Sachs Target Date, Prudential DayOne, Natixis Sustainable Future Funds STEP 5: <u>Extension – Moderately Aggressive:</u> , Schwab Target Index Series, Schwab Target, Principal LifeTime, Principal Lifetime Hybrid, Mutual of America Retirement, MFS Lifetime, Great-West Lifetime, Transamerica ClearTrack, <u>Extension – Aggressive:</u> Vanguard Target Retirement, BlackRock® LifePath Smartbeta, BlackRock® Lifepath Index, BlackRock® LifePath Dynamic, Great-West SecureFoundation®, TIAA-CREF Lifecycle Retirement, TIAA-CREF Lifecycle Index Retirement, GuideStone Funds MyDestination, Nationwide Destination <u>Extension – Most Aggressive:</u> JHancock Multi-Index Lifetime, JHancock Multimanager Lifetime, Wells Fargo Dynamic Target Date, Franklin LifeSmart Retirement Target, T. Rowe Price Retirement, Fidelity Freedom®, Fidelity Freedom® Index, Fidelity Freedom® Blend

TARGET DATE ANALYSIS DEFINITIONS

Terms	Definition & Application
-------	--------------------------

Target Date Index

Dow Jones S&P Target Date Indices are designed to measure the performance of multi-asset-class portfolios. The indices were designed as benchmarks for the growing category of "lifecycle" funds, which are typically used to plan for retirement or other long-term savings goals. The indices automatically adjust their asset allocations over time to reflect reductions in potential risk as an investor's target date approaches.

Target Date Index Asset Allocation

	Equity	Fixed Income
Dow Jones Target Today Index	20.00%	80.00%
Dow Jones Target 2005	20.00%	80.00%
Dow Jones Target 2010	22.11%	77.89%
Dow Jones Target 2015	28.19%	71.81%
Dow Jones Target 2020	37.50%	62.50%
Dow Jones Target 2025	48.92%	51.08%
Dow Jones Target 2030	61.08%	38.92%
Dow Jones Target 2035	72.50%	27.50%
Dow Jones Target 2040	81.81%	18.19%
Dow Jones Target 2045	87.89%	12.11%
Dow Jones Target 2050	90.00%	10.00%
Dow Jones Target 2055	90.00%	10.00%
Dow Jones Target 2060	90.00%	10.00%

DEFINITIONS

Terms	Definition and Application
Alpha	Alpha is a measure of a manager's effectiveness. It is the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. Positive alpha indicates that the fund has performed better than its beta would predict. Negative alpha indicates the fund underperformed given the expectations established by the fund's beta.
Beta	Beta is a measure of the volatility of a security compared to the market as a whole. The market holds a beta of 1. When beta is greater than 1, the fund will move ahead of its indexed market when the market is moving up, ultimately performing better than the market; however, when the market moves down, the fund will underperform the market. When beta is less than 1 the opposite is true. The higher the beta, the greater the volatility. The lower the beta, the lower the volatility.
Down Capture	Calculated by taking the fund's monthly return during the periods of negative benchmark performance and dividing it by the benchmark return. A ratio of less than 100 indicates that a fund has lost less than its benchmark in periods when the benchmark has been in the red.
Up Capture	Calculated by taking the fund's monthly return during the periods of positive benchmark performance and dividing it by the benchmark return. A ratio higher than 100 indicates the fund has outperformed the benchmark during periods of positive returns for the benchmark.
Effective Duration	Duration adjusted for embedded options. A measure of a bond's price sensitivity to interest rate movement.
Effective Maturity	Maturity adjusted for embedded options.
Information ratio	Information Ratio is a benchmark related statistic and measures a fund's outperformance and consistency. The information ratio should be positive. A range between 0.40 and 0.60 equates to a good value while a value of 1.00 is exceptional and rare. This metric is a measure of relative risk and not absolute risk.
Net Expense Ratio	Represents the percentage of a fund's assets that are used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund. Brokerage costs and sales charges are not included. Value should be lower than the fund's respective Morningstar peer group.
Overall Morningstar Rating	Proprietary Morningstar data point. Values are from 1 (lowest) to 5 (highest) and are based on how well the fund has performed, after adjusting for risk and accounting sales charges, in comparison to similar funds.

DEFINITIONS(cont.)

Terms	Definition and Application
Risk/Return	Graph that charts risk (as defined by standard deviation) on the X-axis and return on the Y-axis. It shows the fund's return per unit of risk taken. The higher and to left on the graph depicts higher returns for less risk.
R-Squared	Reflects the percentage of a fund's movements that can be explained by movements in its benchmark index. A value near 100 indicates all movements can be explained by movements in the benchmark index. An index fund will be close to 100. A low value indicates that very few of the fund's movements can be explained by movements in the benchmark index.
Sharpe Ratio	Also known as risk-adjusted return. This is a risk-adjusted measure that is calculated by using standard deviation and excess return to determine reward per unit of risk. Calculated for a past 36-month period by dividing a fund's annualized excess returns (excess returns are defined by the fund's actual returns minus a risk-free rate) by the standard deviation of a fund's annualized excess returns. The higher the value, the better the fund's historical risk-adjusted performance. The lower the value, the worse the fund's historical risk-adjusted performance.
Standard Deviation	Statistical measurement of dispersion about an average, which, for a mutual fund, depicts how widely the returns varied over a certain period of time. This metric is used to try and predict the range of returns for a given fund. A high value signifies greater volatility, as the predicted range of performance is wide. A low value signifies lower volatility, as the predicted range of performance is more focused.
Style Drift	The movement of a mutual fund from one asset category into another. This graph charts inconsistency with style, as defined by a fund's stated category. The smaller dots on the graph represent the starting point for the time period shown and the larger dots represent the most recent time periods.
Turnover Ratio	A measure of a fund's trading activity, calculated by taking the lesser of purchases or sales (excluding all securities with maturities of less than one year) and dividing by the average monthly net assets. A ratio of 100% or higher represents considerable buying and selling of securities. A low ratio indicates a buy-and-hold strategy.
